

Protection for Your Investment Capital

Poor cyber security can result in direct financial losses, regulatory fines, and reputational damage. Unfortunately, most security teams often struggle with what to look for when reviewing the security posture of an investment target. Limited visibility can also make it difficult to fully understand the risks associated with investments or a portfolio, making it harder to prioritize remediation activities accordingly.

BlueVoyant Cyber Risk Management for Investors helps identify and mitigate cyber security issues throughout the investment process, enabling investors to assess, quantify and remediate cyber risks associated with a potential transaction or an investment portfolio.

Cyber Risk Services Integrated into Your Investment Process

BlueVoyant Cyber Risk Management for Investors consists of four offerings:

Investment Process

- Early Summary Report
- Later Stage Full Report

Portfolio Management

- Portfolio Cyber Risk Assessment
- Portfolio Cyber Risk Monitoring

Services can be tailored to your needs based upon each phase of your investment process.

Data focused:

Integrated threat intelligence curated from proprietary global data sets with visibility into millions of companies and thousands of attacks globally.

Expert-driven:

Managed service with initial assessments and new alerts curated by expert analysts.

Fully transparent:

Insights into all scores and findings; full external visibility with no modeling to fill in.

BlueVoyant Cyber Risk Management for Investors helps to:

ASSESS

Evaluate cyber risk associated with investment targets

REVEAL

Prioritize based by identifying key risk factors.

MANAGE
